WEEKLY REPORT

Project ID: PRJ_CSE_05_2026_28	**Student ID:** 24DCS145(TL),24DCS135,24DCS140
From Date: 20/07/2026	**To Date:**26/07/2026
Semester: 5th	**Week No : 2**

Work Completed :

- Finalized Tech stack :

  - Frontend: React.js (Vite) + Tailwind CSS
  - Backend Framework: FastAPI (Python 3.11+)
  - Document Manipulation: `python-docx` (DOCX engine) & `PyMuPDF` / `fitz` (PDF engine)
  - AI Intent & NLP Engine: Google Gemini 1.5 Flash API (For Now)
  - Database: MongoDB Atlas (M0 Free Tier)
  - Caching: Upstash Redis
  - File Storage: Supabase Storage

- Designed the RapidDoc logo and basic UI theme.
- Developed the Login and Sign-Up pages with form validation.
- Created the basic dashboard layout
- Set up the backend server and Connected the database.
- Implemented Register and Login APIs using JWT authentication and file upload API.

Plans for next week:

- Build the document workspace UI.
- Integrate the document viewer for PDF/DOCX files.
- Add Search and Replace functionality.
- Design the DOCX editing engine.
- Design the PDF editing engine.
- Connect the frontend with the document editing backend.
- Show updated document preview after editing(Only search and replace).
